

THE TOWNSHIP OF WELLINGTON NORTH
WATER & SEWER DEPARTMENT

FIRE HYDRANT FLUSHING

The Township of Wellington North Water/Sewer Department will be performing maintenance water main flushing activities in Arthur and Mount Forest on a regular basis.

This work will be done primarily between the hours of 10:00 am and 4:00 pm on Thursdays. Flushing is necessary to ensure chlorine is distributed throughout the water distribution system.

Customers may experience discoloured water for short periods of time. Allowing your cold water tap to run will assist in clearing your water.

Before commencing laundry, please check your cold water tap to ensure the water is clear. Should your laundry become stained with rust, please keep it wet and rewash with an iron removing product (i.e. Ironout) after the water has returned to normal.

Your patience with this inconvenience is appreciated. Should you require more information please contact:

Water/Sewer Office at (519) 848-3620 Ext 4006
